# The Master of Science in Counseling Program

## 2021-2022 Annual Assessment Report

Note: Data includes Summer 2021 – May 2022 semesters

#### Mission Statement

The mission of the SMU Program in Counseling is to prepare students with culturally sensitive knowledge and skills to practice effectively and ethically in counseling-related positions in schools, agencies, private practices and mental health facilities.

#### Summary

The Counseling program maintains data on three priority program objectives important for assessing our overall effectiveness as program. These data help guide program analysis efforts and the overarching direction and focus of the program.

The Counseling program collects data related to nine student learning outcomes (SLOs) that are measured at least two times for each student throughout their program of study, and three SLOs, one for each CACREP Specialty including School Counseling; Marriage, Couple and Family; and Clinical Mental Health. Data from SLOs provides indicators of level of preparedness to work as future counseling professionals. Counseling faculty review SLOs each year and make changes as necessary to ensure high quality training and supervision.

The Counseling program collects data related to clinical competencies for each counseling program student across the following clinical courses: Basic Clinical Methods, Advanced Clinical Methods, and Practicum through the use of the Clinical Progress Assessment (CPA). Data from CPAs indicate clinical skills competencies and preparedness for Internship I and II and future counseling practice.

The Counseling program collects data related to student professional dispositions recognized as essential for effective, ethical, and responsible functioning in the counseling profession (e.g., professionalism, communication skills, attitude towards peers/instructors, ability to self-regulate, etc. and other characteristics required in a clinical or professional environment) and monitors student progress individually and aggregately.

The Counseling program collects data from key stakeholders (e.g., alumni, site supervisors and employers of graduates) every three years to assess the stakeholder's perceptions of the quality of the educational experience of students and clinical preparedness of students. This data helps the Counseling program faculty to assess and prioritize curricular and programmatic updates in keeping with professional trends.

**Table 1: Program Objectives** 

	Data to be Collected: Program Objectives				
Program Objective	Measure(s) used to evaluate program objectives	Data			
PO.1. Prepare and equip graduates with the knowledge base and skill set necessary to pass the National Counselor Examination (NCE).	National Counselor Exam (NCE) Score reports Key Performance Indicator scores	In the 2021- 2022, 28 students completed the NCE with a 100% pass rate compared to the national exam pass rate of 60%.  See Key Performance Indicator data below.			

PO.2. Maintain or increase the number of prospective student applications each year with the aim of recruiting and enrolling well-qualified applicants.	Number of applications     Percentage of applicants offered admission	In the fall of 2021, received 158 applications and accepted 64, and 47 matriculated, which is a 40.5% acceptance rate.  In the spring 2002, received 119 applications and accepted 68, and 53 matriculated, which is a 57% acceptance rate.
PO.3. Cultivate a cohesive, programmatic counselor identity among faculty through professional organization involvement, professional service, publications, presentations, and outreach.	Annual report on faculty participation in activities related to the counseling profession.	Data is kept in Digital Measures. For 2021 – 2022, Counseling program core faculty developed a total of 28 refereed presentations and publications.

Much lower	0.00%	0
Total	100%	76

### **Observations and Program Modifications**

Counseling program faculty discussed implementation of changes to elective concentrations, noting that the courses for the new Art and Science of Trauma Treatment concentration have been approved: HDCN 6338 The Science of Interpersonal Neurobiology & Trauma Counseling and HDCN 6344 The Art of Trauma Treatment: Expressive, Somatic & Experiential Methods The formal concentration will begin in fall 2023. Additionally, two courses in the child and adolescent concentration, Family Play Therapy and Therapeutic Parenting, were consolidated into one course: HDCN 6325Therapeutic Parenting: Family Play and Child/Adolescent Parent Relationship Therapy. Lastly, two courses from the addiction elective concentration were also combined into one course: HDCN 6353: Treatment of Addictions: Counseling Methods and Psychopharmacology.

Counseling program faculty noted that in the last program evaluation meeting the faculty agreed to update the MoCCe. It was updated in Summer 2022. Therefore, the data collected and reported in 2021-2022 is from the old version of the exam. Starting next year, we will review the data through the lens that this is the first year to collect data with the modified version of the exam, and we will continue to monitor trends in future administrations of the exam.

Counseling program faculty discussed the Stakeholder Survey, which is distributed every three years to internship site supervisors, known employers of SMU students, and alumni, to systematically collect impressions of external stakeholders who can provide i their perceptions of the quality of the education SMU provides. In addition to ratings, stakeholders provided open-ended responses about strengths and potential areas of improvement that were reviewed by faculty. Thematic strengths identified include knowledge and clinical experience of the faculty, supportive faculty relationships, clinical strength of internship students and graduates, ethics training, and multicultural and diversity training and practice. Ratings of knowledge and skills of graduates (Table 6) are overall very high; however, open-ended comments focused on potential areas of growth including a focus on trauma-informed practice and diversity training. Based on the review of this data, the faculty will continue to monitor infusion of trauma-informed practices in classes and will receive continuing education in trauma-informed counseling during academic year 2022 – 2023. Additionally, the Clinic Director and Diversity Committee Chair suggested that the faculty review the diversity curriculum crosswalk that the faculty created in 2021 for continued and ongoing review and improvement. Counseling faculty will meet in fall 2022 to review existing and new strategies toward the goal of continuous improvement in the areas of trauma-informed practice and diversity.

In review of the student professional dispositions data, faculty noted that FYI reports need to be disaggregated from the Student Update forms with Minor, Moderate, Major or Disciplinary concerns in order to maintain data integrity as we track student progress in the program.

In terms of annual assessment data collection, the Program Specialist noted some inconsistencies in how and where data was obtained from internal SMU systems. A review of the data collection procedures resulted in clarification on how the program will collect data in the future, including running queries in Slate and my.smu as opposed to pulling data from a stand-alone database. Additionally, the program will use the census date information for all enrollment related reports.
