

What's On Your Mind – February 2009

- More war and action movies like Behind Enemy Lines and The Punisher. Those are classics. If you could get the movie Mr. Brooks that would be great.

*The above titles have been requested for purchase.*

- Computer tech books are old. Anything over 2000 is pretty useless. Recycle—save space on shelves.

*We are in the process of reviewing materials on our shelves for withdrawal pending a major shifting of the collection (to improve usability). Many superseded volumes will be withdrawn, including selections from the technology sections, particularly outdated volumes. Some we may retain for historical purposes.*
