

**Holden Lab**  
**Psychology Research Assistant Position – Fall, 2009**

**Brief Description of the Research:** Several different studies are on-going concerning negative emotion in the family and its effects.

**Activities of the RA:** Students will engage in a variety of tasks. Tasks include recruiting participants, helping to collect physiological data, transcribing audio-recordings, coding data, and entering data into computers.

**Time Commitment & Credit:** We seek students willing to commit two semesters (one can be the summer). Six to nine hours per week. Varying amounts of course credit can be earned, depending on number of hours worked.

**Other Pertinent Information:** Only responsible, conscientious, and motivated students need apply! Graduate school bound students are especially desired.

**Contact Information:** Grant Holland or Paul Williamson, 8-1532; holdenlab@smu.edu
