

RALPH J. CICERONE is president of the National Academy of Sciences and chair of the National Research Council. Before coming to the Academy, he served from 1998 to 2005 as chancellor of the University of California at Irvine, where he had been dean of physical sciences and a member of the faculty since 1989. He has received a number of awards for his research in atmospheric chemistry and climate change, which was recognized on the citation for the 1995 Nobel Prize in chemistry awarded to UCI colleague F. Sherwood Rowland. He has served on many NAS and NRC committees, and chaired the 2001 study of the current state of climate change and its impact on the environment and human health requested by President Bush. Dr. Cicerone is a member of the American Academy of Arts and Sciences and the American Philosophical Society, and has served as president of the American Geophysical Union. He received his bachelor's degree in electrical engineering from the Massachusetts Institute of Technology, where he was also a varsity baseball player, and his master's and doctoral degrees from the University of Illinois in electrical engineering, with a minor in physics.
