## Lyle School of Engineering

### 4+1 Master's Degree Program

#### Requirements

For students admitted to the 4+1 Program, up to nine (9) semester credit hours of graduate courses (7000-level and above) may be applied toward fulfilling the student's undergraduate program requirements. The student must complete a minimum of 21 semester credit hours of graduate course work at SMU beyond the undergraduate residency requirement to satisfy the graduate residency requirement. In addition, the 4+1 student is permitted to take additional graduate courses while an undergraduate, up to their eighth semester, that can be marked for graduate credit only. No graduate course work for graduate-only credit will be permitted after the eighth semester, although the students will be permitted to take dual-credit graduate courses (up to 9 hours) even beyond the eighth semester. Furthermore, the student must take at least one of the courses for the graduate degree while holding graduate status, i.e., after the student graduates with the undergraduate degree.

NOTE: Undergraduate students may take graduate courses only after they have reached senior status (90 or more earned credit hours).

## Admission

## Transfer Credit

Regardless of the number of transferable credit hours completed elsewhere, University policy requires that of the 122 minimum credit hours required for a degree, at least 60 hours must be SMU credit hours. That is, they must be earned in SMU courses, SMU credits or SMU-approved international programs.

No transfer credit is given for any correspondence course or work completed at a school that is not accredited by a regional or national accrediting agency. Only grades of C- or better in comparable courses are transferable to SMU for accepted students. Vocational-technical courses, courses below college level, credit by examination earned at another college or university, and PE activity courses in excess of two hours do not transfer. For courses not taught at SMU locations or in SMU-approved international programs, free-elective transfer credit (FETC) may be awarded for appropriate courses completed with a grade of C- or better at regionally accredited colleges or universities that meet SMU's academic standards. FETC is assigned by a faculty committee appointed to review courses for transferability, or used by the Office of the University Registrar if courses are considered transferable but lack sufficient information to determine an exact equivalency. Similarly, Business Elective Transfer Credit (BETC) is used to award transfer credit by the Cox School of Business' Office of BBA Academic Advising, Records and Special Programs, for transferable courses where there is not an equivalent business course prefix.

All attempted hours and earned grade points are used to calculate the transferable GPA for transferable courses, even if those courses have been repeated or are not transferable. For repeated courses with grades of C- or above, only the first attempt completed with a grade of C- or better is awarded credit. Transfer course grades are not calculated in major/minor GPAs. A grade of W (Withdrawn) is not used to calculate the transferable GPA. A grade of I (Incomplete) is calculated as F. A grade of IP (In Progress) for a current term is not calculated.

**Note:** For some majors requiring a subset of courses and specific GPAs for entry, the subset GPA is calculated using the first graded attempt of these courses, even if the first attempt of the course was failed or later repeated.

Official college transcripts are required for all college-level work attempted, regardless of transferability. Transcripts must be sent directly to SMU from the institution attended. A transcript issued to a student is acceptable provided it is received in a sealed, letterhead envelope with the institution's Office of the Registrar stamp. Transcripts must be dated fewer than three years prior to processing. Coursework from one institution that appears on an official transcript from another institution will not be accepted for transfer credit. An official transcript must be issued by each institution attended. Photocopies of transcripts provided by other institutions are not acceptable.

An online version of the transfer credit evaluation is available to transfer students prior to their enrollment.

## Cox School of Business

### Admission

#### Admission of External Transfer Students to a Business Major/B.B.A. Degree Program

##### Notes

- For admission purposes to the Cox B.B.A. program, the all-college cumulative GPA is recorded at the end of the term the student completes the business subset courses AND has at least 39 cumulative credit hours. The all-college cumulative GPA includes all SMU coursework and courses completed at all other colleges if these courses have content-based equivalents at SMU. If credit is nontransferable because the grade earned is below C-, but the course is equivalent in content to an SMU course, the grade will count toward the all-college cumulative GPA.
- Current University grading policy, as summarized under Academic Forgiveness in the General Policies section of this catalog, permits forgiveness of academic work taken 10 or more years prior to the term of admission. Academic work forgiven under this policy will not be included in the all-college cumulative GPA.
- Students must have passing grades in all subset courses before entering the Cox School.
- When evaluating courses taken at other colleges or universities, the Cox School will use the grades and credit hours designated by the school at which the courses were taken. **Business Elective Transfer Credit (BETC) is used to award transfer credit for transferable courses where there is not an equivalent business course prefix.** The Cox School will not recalculate grades earned at schools that use grading systems different from SMU's nor change the number of credit hours for a course.

Transfer students who have not completed the business subset courses may be eligible for admission to SMU as prebusiness majors and will then follow the admission requirements outlined above for current SMU students. Those who have completed the subset courses but who do not meet Cox admission requirements may be eligible for admission to SMU via the extended subset option or for admission to SMU to pursue a nonbusiness major.

## SMU Abroad

### Programs and Courses

A complete list of SMU Abroad programs is available on the website. Individual courses approved in the last several years are listed at [www.smu.edu/abroad](http://www.smu.edu/abroad) in the SMU Abroad course database. All new abroad courses must be petitioned for approval before the period of study abroad begins. SMU Abroad uses the course prefix FESA (Free Elective Study Abroad) to award SMU credit for courses taken at non-US institutions for which there is no SMU equivalent. Information on the course petitioning process is available on the SMU Abroad website. Students may also request UC credit for courses taught by non-SMU faculty on term and summer programs through SMU Abroad; more information can be found on the SMU Abroad website. Students who wish to take courses on a no-credit or pass/fail basis should review the Grade Options for Courses Taken on SMU Abroad Programs and the Pass/Fail Option sections found under Grade Policies in this catalog.

SMU Abroad students will be charged SMU tuition at the SMU tuition rate on campus, as well as miscellaneous fees and a fee for mandatory international health insurance. Students will be billed by SMU at the usual time. SMU in turn will pay the academic costs of the abroad program. Details on SMU Abroad costs and billing procedures are available on the SMU Abroad website.

*(updated 1/24/2018; effective for the 2017-2018 catalog)*

## Enrollment and Academic Records

### Grade Policies

#### Grade Replacement Repeat

Effective for courses taken Fall 2017 or later, students may repeat up to six courses taken at SMU for which grades of D+ or lower were received. The grade from the repeated course, even if lower, will be the grade used to calculate the student's GPA. A course may be repeated only once under this policy.

Students must repeat the exact same course originally taken to be considered a repeat. The course must be taken at SMU. Not every course is offered again and thus may not be available to be repeated. Students cannot take or repeat a course that is a prerequisite for a course already satisfactorily completed.

The student must declare to his or her academic records office by the last day to drop a course (with a grade of W) which courses he or she will repeat under this policy. Once the declaration is made, it is irrevocable. Only the credit hours of the repeated course and not the initial credit hours count toward the number needed for graduation. Both the initial and the second grades are shown on the student's permanent academic record. Probation, suspension and dismissal, as determined by the initial grade, stands. Students are cautioned that for some purposes, such as admission into an academic program, both grades or only the initial grade may be used.

Note: This policy replaces the former First-Year Repeat policy. Any repeats taken under the First-Year Repeat policy will count against the total Grade Replacement Repeats allowed.

\*Students who entered SMU during 2016-17 under the 2016-2017 First Year Repeat policy may repeat classes taken before Fall 2017, per the guidelines of that policy.

## Grade Average Repeat

In all other cases, students will be allowed to repeat courses according to the following rules: Both the initial and the second grades will be recorded on the student's permanent academic record. Both grades will be included in the calculation of the GPA and in the determination of academic probation, suspension, dismissal, honors and graduation. Only the repeated course and not the initial credit hours count toward the number of hours needed for graduation.

**Note:** Students cannot take or repeat a course that is a prerequisite for a course already satisfactorily completed.

*The courses a student can repeat are determined by the school of record:*

**Dedman College of Humanities and Sciences.** Students can repeat courses in which the original grade was *D+* or below. Other requests to repeat courses can be made by petition in consultation with the academic adviser/department through the Dedman Office of Records and Academic Services.

**Cox School of Business.** Students can repeat only those courses in which the original grade was a *D+* or below.

**Lyle School of Engineering.** Students can repeat courses in which the original grade was a *C-* or below. Such courses can be repeated only once.

**Meadows School of the Arts.** Students can repeat courses in which the original grade was a *C-* or below. Such courses can be repeated only once.

**Simmons School of Education and Human Development.** Students majoring in applied physiology and sport management can repeat a course once in which the original grade was a *D+* or below. Students in the Department of Teaching and Learning's educational studies degree program must repeat all required teacher education courses if they earn below a grade of *C*. All other undergraduate students in the Simmons School may repeat a course once if the original grade was a *C-* or below.

(updated 2/13/2018)

## Admission

### Credit by Examination

#### Examinations Administered in High School

SMU grants credit and placement for scores of 4 or 5 on most Advanced Placement examinations taken in high school (see table below). Credit will be awarded only for exams taken while in high school. Students may not receive credit for an AP exam, an International Baccalaureate exam and a college course covering the same subject matter; i.e., the course equivalency will only be awarded once. Credit by examination granted at SMU is considered resident credit.

An official copy of test results must be sent from the testing agency to the University Registrar's Office for credit. To facilitate advising and enrollment, students should submit their official scores no later than the first day of class.

### Notes

- AP credit in the sciences may be used to satisfy the Science and Engineering breadth requirement of the University Curriculum. The UC's Natural and Applied Science depth requirement must be satisfied through coursework at SMU or through transfer credit of a science course with lab from an accredited college or university.
- Physics does not award placement credit for labs.
- Duplicate credit is not allowed toward an SMU degree. Students who enroll in classes that duplicate Advanced Placement, International Baccalaureate or other test credit awards will lose these credits after the fifth day of the term. Once credit is revoked, it may not be awarded again. Students must report any credit by exam no later than the end of their first term of enrollment.
