

The Master of Science in Data Science and Applied Statistics program at SMU is designed to give your career that edge in this highly competitive field. In consideration for the commitments many of our students have, MDSAS allows our students to be full-time or part-time. Not requiring students to be full-time throughout the program allows them to adjust their own course load for each semester. This invites flexibility for working professionals to attend classes while working. Below are sample course schedules for full-time MDSAS students.
