### RESEARCH GRANTS

---

#### Awarded:

NARSAD Young Investigator Award Brain and Behavior Research Foundation Detecting PTSD in Natural Language	<b>Oltmanns (PI)</b>	01/2022 — 01/2024 Total costs: \$69,538.00
---	----------------------	---

This project will develop artificial intelligence-based language scores for PTSD in 3,000 World Trade Center (WTC) responders. These tools may facilitate screening and care by providing behavioral PTSD markers and informing prognosis and monitoring of treatment response, while simultaneously reducing assessment time demands.

**Role: PI**

F31 AG055233 National Institute on Aging A Longitudinal Investigation of Maladaptive Personality Traits as Reported by the Self and Others in the Prediction of Physical Health	<b>Oltmanns (PI)</b>	05/2017—05/2020 Total costs: \$132,132.00
--	----------------------	--

Ruth L. Kirschstein National Research Service Award (NRSA) Predoctoral Fellowship

This study examines the predictive utility of maladaptive personality traits for physical health in a longitudinal study of a representative sample of older adults. The goal is to develop scientific understanding of the relationships between maladaptive personality traits and health across time.

**Role: PI**
